PROFESSIONAL SUMMARY

Senior Gameplay Programmer and Technical Lead with 4+ years of experience in Unreal Engine 5 and C++, specializing in gameplay systems, Gameplay Ability System (GAS), server-authoritative multiplayer and AI. Built FPS, co-op horror, RTS, VR and simulation projects, including Steam integration for multiplayer. Lead and mentor a team of 3–5 developers at Nine Hermits Games, owning architecture decisions, code reviews, task planning and client communication across three concurrent projects.

PROFESSIONAL EXPERIENCE

Senior Gameplay Programmer & Tech Lead | Nine Hermits Games

02/2026 – Present | *Colombo, Sri Lanka*

Unreal Engine FPS shooter (original IP) – Senior Gameplay Programmer

- Design and implement core first-person shooter gameplay in Unreal Engine 5 and C++ for an original IP.
- Own gameplay features from prototype to production-ready implementation.

React-based web interactive games and service-based games – Tech Lead

- Lead and mentor a team of 3–5 developers, owning architecture decisions, code reviews, task planning and client communication.
- Deliver React-based interactive web games and service-based games, including Midan, a live trivia game built as sole developer.

Lab Simulator – Lead Developer & Mentor

- Lead development of a lab simulation game for a Canadian client, owning technical delivery.
- Mentor developers on gameplay programming practices and project workflow.

Most Nine Hermits projects are under NDA; details available on request.

Gameplay Programmer (Contract / Project-Based) | Nine Hermits Games

11/2025 – 02/2026 | *Colombo, Sri Lanka*

- Integrated 25 mini-games (2D and 3D) into one shared 3D world; built player login and leaderboards.
- Fixed and optimized gameplay and system bugs; redesigned UI flows and map navigation.

Gameplay Programmer (Part-Time, Contract-Based) | Software Districts

04/2022 – 07/2026 | *Lahore, Pakistan*

- **Co-op horror multiplayer game:** built the survival loop and gameplay mechanics, a server-authoritative architecture (RPCs, replication), Steam sessions and lobby, role-based abilities, and revive and sanity systems.
- **Order of Danann:** attack systems, enemy AI and mechanics with the Gameplay Ability System (GAS).
- **Trib 3** (multiplayer combat and networking) and **Karma & Jonar** (co-op systems, AI and combat).
- Also delivered: procedural city generator, Gravity Gun shooter, VR zombie combat, and a Chinese RPG prototype.

Gameplay Programmer (Intern, then Associate) | G-Devs.com

09/2022 – 11/2025 | *Warsaw, Poland*

- Improved AI, NPC behaviors and resource management systems for **Rich Dad Simulator**.
- Engineered RTS mechanics for **War Miner**: resource management, base building, real-time combat and multiplayer.

Gameplay Programmer (Volunteer) | Atarious Studio

09/2023 – 03/2024 | *Colombo, Sri Lanka*

- Built core horror gameplay mechanics, enemy AI and puzzles for **Janda: The Mansion** to deepen player immersion.

TECHNICAL SKILLS

Languages: C++, C#, Python

Engines & Frameworks: Unreal Engine 5, Unity

Multiplayer & Networking: Server-authoritative architecture, replication and RPCs, anti-desync handling, Steam sessions and lobbies, co-op systems, proximity and push-to-talk voice chat

Gameplay & Systems: Gameplay Ability System (GAS), combat and ability systems, core game loops, character controllers and animation, player progression, 2D and 3D game systems, rapid prototyping

AI: Navigation, perception systems, behavior trees

VR / AR: Immersive interaction design, VR gameplay systems, performance optimization

Leadership: Technical leadership, mentoring, architecture decisions, project delivery

Tools & Services: Git, Perforce, JIRA, Firebase, Steam integration, debugging and performance profiling, React and JavaScript (web games)

Design & UI: Game math, UI/UX development

EDUCATION

BSc (Hons) in Software Engineering (Second Upper) | University of Kelaniya, Sri Lanka | 2020 – 2024

- Specialization: Game Development

SELECTED PROJECTS

- **Midan** – sole developer of the live public trivia game (Nine Hermits Games): https://midan.app
- **Order of Danann** – combat mechanics and AI built on Unreal's Gameplay Ability System.
